Summary

Full stack developer with experience building fast, scalable, and interactive applications across domains like analytics, SEO, and AI interfaces. Currently focused on transitioning into applied AI, with hands-on experience integrating LLMs, building RAG systems, and optimizing AI-driven user experiences. I enjoy working on impactful products, solving complex technical challenges, and continuously pushing the boundaries of what tech can do.

Technologies

Typescript | Javascript | Turso | Mongodb | Supabase | pineconeDB | HTML | CSS | ReactJs | NextJs | Fastify | ExpressJS | NodeJS | Redis | React Native | Python | FastApi

Experience

[Innerloop Streaming](#)

Bengaluru, India (Remote)
Aug 2023 - currently working

Full stack developer

- Worked on Added caching for the dynamically generated video/image previews on the client
- Added caching for the repeated api calls using redis
- Added features in the player like interactions, shoppable experience, Ai chat and QNA
- Implemented client-side routing, lazy loading, and dynamic imports to reduce JavaScript bundle size and improve performance.
- Built interactive and real-time analytics dashboards to visualize user and content performance metrics.
- Collaborated with backend developers and designers to deliver seamless API integration and pixel-perfect UI based on Figma designs.

[Cloudrocks Technologies](#)

Bengaluru, India (Remote)
April 2022 - Aug 2023

Full stack developer Intern

- Optimized and revamped the showcase experience for better performance, responsiveness, and SEO discoverability.
- Streamlined the team management module by refactoring code, improving data handling, and enhancing UI workflows.
- Wrote and optimized complex queries using Google BigQuery to fetch large-scale analytics data with minimal latency.

[Kalpas Innovations](#)

Hubli, India (Remote)
Aug 2021 - Sep 2021

React developer Intern

- Improved experience of landing page by compressing assets and remove buggy code
- Converted legacy react code to the reusable function hooks code
- Implemented client-side routing, lazy loading, and dynamic imports to reduce JavaScript bundle size and improve performance.

Projects

[LawyrHub](#)

2025

LawyrHub is an AI-powered legal assistant platform where users can ask legal queries. The system uses a robust retrieval-augmented generation setup to fetch the most relevant legal provisions and respond in plain language.

Typescript | Langchain | PineconeDB | Mongodb | Tailwindcss | Nextjs | Gemini

[Personal Portfolio](#)

2025

A personal portfolio that showcases my projects, experience, and education, along with an integrated chatbot that can answer visitor queries based on the content of my work and background.

Typescript | Supabase | Tailwindcss | Groq

[React media hooks](#)

2022

Hooks for camera, microphone and screen-recorder

Typescript | Reactjs

[Twitter Clone](#)

2021

Twitter clone (X)

Reactjs | GraphQL | Apollo-server | Apollo-client | mongodb | express.js | cloudinary

Education

Goa College Of Engineering (2019-23)

Goa, India

- Completed Bachelor's of Engineering in Information Technology

Harmal Panchakroshi Shikshan Mandal (2006-19)

Goa, India

- Completed Primary, highschool and higher secondary education
